Dear Sir/Madam,

I am writing to express my interest in pursuing an internship opportunity at your esteemed organization. As a motivated and dedicated IT undergraduate student, I am eager to apply my skills and knowledge in a practical setting, and I believe that your company would provide the perfect platform for me to grow and learn.
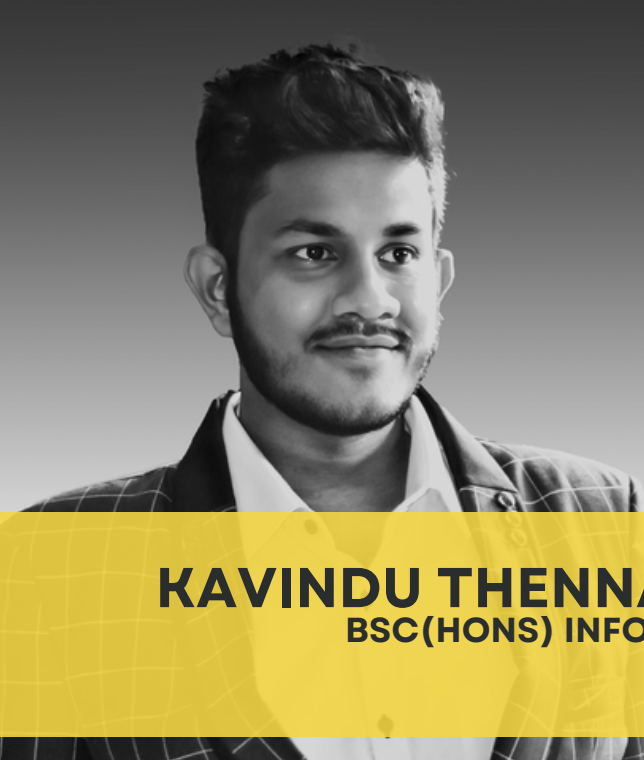

I am currently pursuing my Bachelor's degree in Information Technology at SLIIT. Throughout my academic journey, I have developed a strong foundation in various areas of IT, including programming, database management, and network administration. I have done several projects using Java and java servlet, php and also using MERN stack. I have also gained hands-on experience through several projects and coursework, which have enhanced my problem-solving abilities and sharpened my attention to detail.

I am drawn to your company due to its exceptional reputation in the industry, commitment to innovation, and emphasis on employee growth and development. Your company's values align closely with my own, and I am inspired by the opportunities for professional growth and learning that your organization provides.

Thank you for considering my application for an internship at your company. I am excited about the possibility of contributing to your team and learning from experienced professionals. I have attached my resume for your review, which provides further details about my qualifications and experiences.
Thank you for considering my application.

Sincerely,
Kavindu Tennakoon

PROFILE INFO

Dedicated IT undergraduate with a passion for problem-solving and teamwork. Hardworking and committed to academic success, with a track record of excelling in coursework and completing projects on time. Possess strong problem-solving skills and able to work collaboratively to identify and implement effective solutions. SKILLS

SOFT SKILLS

- Ability to Work Under Pressure
- Self Motivation
- Leadership
- Adoptability
- Time Management
- Problem Solving
- Analytical Thinking

EXPERIENCE

- **Fullstack Developer | ICTA**
  In four months at ICTA, I developed full-stack applications, collaborated in team projects, and achieved goals, enhancing my skills in company projects.

PROJECTS

- Version control with Git
- The Projects :
  - Green Leaf Information Management System [MERN]
  - Patient Management System [MERN]
  - SriLanka eParticipation Portal
  - Kavindu Thennakoon portfolio website

PROJECT DESCRIPTIONS

- **Green Leaf Information Management System**

This section oversees the comprehensive management of income and expenses within a system. It can retrieve and display detailed financial data from other sections, calculate net profit, show daily totals, and generate reports. The system also allows for searching specific income and expense records based on dates.

- **Patient Management System [MERN]**

I built a Patient Management System using MongoDB, Express.js, React.js, and Node.js. It helps healthcare professionals add, update, and delete patient information easily. I also added a feature to generate PDF reports for quick analysis. The system is fast, scalable, and the project demonstrated my ability to work on both the front and back end effectively.

- **SriLanka eParticipation Portal**

GovEngage: A collaborative platform for civic participation. This repository houses the codebase for a web application where governments can publish public consultations, citizens can provide feedback, and officials can share events, news, and press releases to foster transparent and inclusive governance.

- **Kavindu Thennakoon portfolio website**
